It has come to my attention that many of you have expressed your frustrations regarding my experiences alongside Colonel Churchward and his Rangers as we confronted bandits in the rugged foothills of the Himalayas.
Your comments have ranged from critical observations to more biting remarks, and at times, the language used

has been so colorful that it could make even the most seasoned sailor blush.
I understand that my adventures may seem extravagant or even reckless to some, but I assure you that the challenges we faced were not only significant but also deeply transformative.
The harsh terrain and the relentless pursuit of justice

against those who prey on the vulnerable demanded not just courage but also a profound commitment to the ideals we stood for.
It is essential to recognize that these experiences were not merely tales of heroism; they were lessons in resilience, camaraderie, and the complexities of human nature in the face of adversity.

While some of my current detractors may raise valid concerns regarding my frequent revisits to this obscure source for inspiration, I firmly believe that future historians will lament my fortunate discovery of remnants from the illustrious Hall of Records belonging to the First CIS Humans, a civilization that ultimately met its demise.

The significance of these fragments cannot be overstated, as they hold the potential to illuminate the complexities of a society that once thrived, offering invaluable insights into their culture, achievements, and the circumstances that led to their downfall.
It is this very pursuit of knowledge that drives my exploration, and I am

convinced that the narratives unearthed from this hidden well will not only enrich our understanding of the past but also serve as a cautionary tale for future generations.
Thus, while criticism may arise in the present, the true value of my endeavors will be recognized in the annals of history, where the echoes of the First CIS

Humans will resonate through time, thanks to the stories I strive to tell. Despite being bound by editorial constraints and compelled to follow a rigid protocol dictated by influential forces that claim to safeguard the authentic narratives of our past, I have been granted the rare opportunity to explore and replicate illustrations from

the neglected tomes of an era we have been urged to overlook.
These volumes, often shrouded in dust and obscurity, hold within their pages a wealth of knowledge and insight that challenges the dominant narratives we are presented with today.
The illustrations I have encountered serve as a poignant reminder of the

rich tapestry of history that has been systematically erased or altered, urging us to confront the truths that lie beneath the surface. It is imperative that we reclaim these lost stories, for they not only enrich our understanding of the past but also empower us to question the present and shape a more informed future.

As I have frequently mentioned, this situation is quite fortunate, considering that the text contained within these ancient manuscripts is inscribed in a long-extinct language. This language has proven to be so elusive that even the most brilliant scholars of other ancient languages, such as the renowned Mister Steichen—who was not only a close associate of

Colonel Churchward but also the first to decipher the Sumerian codes—have found themselves unable to unlock its secrets.
The complexity and obscurity of these writings present a formidable challenge, underscoring the depth of knowledge that has been lost to time.
Thus, while the allure of these manuscripts is

undeniable, the reality remains that their true meanings may forever elude our grasp, leaving us to ponder the mysteries they hold.

During my brief yet impactful years under the guidance of Colonel Churchward, I meticulously created hundreds of reproductions of illustrations that were concealed within previously

established works. The profound respect and admiration that the local communities—ranging from the humblest villager to the most esteemed monk in the monasteries—held for Colonel Churchward's humanitarian efforts during the devastating famine years in northern India have granted me the privilege to share these insights with

encouraging a deeper

compassion and resilience that Colonel Churchward embodied.

I am honored to share with you a remarkable discovery that invites you to join a select group of seekers, akin to the renowned Jesuits of Truth, who are dedicated to uncovering the knowledge and insights obscured by powerful, perhaps even metaphysical, forces from

the collective consciousness of humanity for over a millennium.
The original title of this manuscript has been lost to the fog of a thousand generations steeped in ignorance, yet I vividly recall the wise old monk who first introduced me to its pages. He mentioned that a rough translation of the title might be something along the lines of "The Daughters of

This intriguing phrase hints
at a rich tapestry of history

I will conclude this
discussion before it spirals

drawn-out debate over the existence of the Tartarian homelands, a topic that often serves as a platform for dubious authors seeking to profit from sensationalized narratives. Such discussions tend to be driven by ego rather than evidence, transforming into a battleground for those who wish to illustrate their beliefs about the perceived moral decline associated

with the so-called Ahriman Great Social Reset of our times.
Engaging in this discourse risks diverting our attention from more pressing issues, as it often becomes a futile exercise in speculation rather than a constructive exploration of historical truths.
As a final thought and a potential topic for future

exploration, I find the notion that Tartarian lands were not a tangible place on Earth to be particularly captivating.
Instead, it is proposed that Tartaria existed in a realm beyond our physical reality, perhaps within the vast expanse of the Multiverse. This intriguing theory suggests that access to Tartaria is possible only through an ancient "Star
